

JOIN OUR TEAM!

COVID-19 & PERINATAL EXPERIENCES (COPE) STUDY

Contribute to a national NIH-led initiative examining how the early environment during the COVID-19 pandemic shapes infant brain and behavior in order to inform potential interventions aimed at improving the lives of children and families

The COPE Study, run by Dr. Moriah Thomason in the Department of Child and Adolescent Psychiatry at NYU Langone Health, is seeking volunteer student research assistants!

BENEFITS OF RESEARCH OPPORTUNITIES:

LEARNING

Contribute to research investigating child brain development and population health

COLLABORATION

Work with a diverse team of students, staff, and faculty across academic disciplines

MENTORSHIP

Gain research experience and mentorship that will strengthen your post-graduate career

Interested students, please email your resume & cover letter to Maya.Ruiz@nyulangone.org
